

Patient ID	1000602640	Patient Name	KAKOLI
DOB	27-Dec-2003	Age	18 Y 7 M 30 D
Gender	Female	Ref. By	Dr. Afsari Ahmad

Department of Pathology Laboratory
Cytology Report

Specimen Information	Collected	25-Aug-2022	8:42 pm
Cervical Smear	Received	25-Aug-2022	8:42 pm
	Report Generated	27-Aug-2022	4:05 pm

LAB ID	C- 16008/22
Investigation	Liquid Based Cytology (LBC)
Specimen Adequacy	Adequate
Satisfactory for evaluation	Satisfactory
Infection	
Fungal (eg Candida)	Absent
Bacterial (e.g. Actinomyces sp. Chlamydia sp)	Absent
Protozoan (e.g. Trichomonas vaginalis)	Absent
Viral (e.g. Cytomegalovirus, Herpes simplex)	Absent
Inflammation	Severe intraepithelial inflammation
Epithelial Cell abnormalities	
Squamous cell	
Atypical squamous cells of undetermined significance (ASC-US) can not exclude HSIL (ASC-H)	Absent
Low-grade squamous intraepithelial lesion (LSIL) encompassing HPV/mid dysplasia cervical intraepithelial lesion (CIN I)	Absent
High grade squamous intraepithelial lesion(SIL) encompassing moderate and severe dysplasia, carcinoma in situ CIN 2 CIN 3	Absent
Squamous cell carcinoma	Absent
Glandular Cell	
Atypical glandular cell (AGC)	Absent
Atypical glandular cell, favor neoplastic	Absent
Endocervical adenocarcinoma in situ	Absent
Adenocarcinoma	Absent
INTERPETATION / RESULT	
Negative for intraepithelial lesion or malignancy	Negative for malignant cell.
